

FCC Commissioners
The Federal Communications Commission RE: Docket 04-435
445 12th Street, SW
Washington, DC 20554

Dear FCC Commissioners ,

I am writing to voice my concerns about the FCC's proposal to relax the restrictions on the use of cell phones on airplanes in flight.

There is no hard evidence that cell phone use doesn't interfere with navigational instruments. The introduction of cell phone use in the cabin will not only increase tension among passengers, it will compromise flight attendants' ability to maintain order in an emergency. Cell phone use could also enable terrorists to coordinate a plan of action more effectively.

Furthermore, what has changed your minds on this, do cell phones have to be used, cause a problem then be subject to ban again? Do you want to be in the air with, say, fifty phones in use and number 51 'breaks the camels back'? I thought this was part of the original argument to prevent them.

Please leave the current rules in effect.

Sincerely,

frank hayes
